What is Zenicor Direct?

With Zenicor Direct, we offer an extra pair of hands ready to step in where needed. The service includes everything from device logistics to interpretation services that are adapted to your needs.

Direct to early diagnosis

Speedy service from the start of an investigation to a completed report.

Reduce waiting times

The complementing services from Zenicor Direct can help to reduce waiting times for patients. As a permanent additional resource or on ad hoc demand basis to help with your daily operations.

Interpretation service

Our qualified staff with knowledgeable ECG interpretation provide the completed reports via Zenicor View. The interpretation service can be offered as an ongoing service where all patient investigations are automatically provided with completed reports or on ad hoc basis when additional resources are required.

Logistics service

To ensure you always have access to ECG equipment ready to use to initiate new patient investigation. At the end of each investigation period patient simply returns the ECG device via mail to Zenicor.

Start an investigation and download a completed report, we take care of everything else

- Complete interpretation partner for your arrhythmia investigations, leave the interpretation completely to us.
- On-demand service for temporary interpretation assistance.
- All types of reports quickly downloaded in the same system.
- Ongoing interpretation and quality control of single-lead ECG investigations.
- Avoid logistics and queues. Equipment always available and ready to initiate patient investigations.
- Customised reports.
